

Launch Complex 46

***** RFP Notification *****

The status of this Request for Proposal is CANCELED. The results of the bids Space Florida received for this project were vastly divergent. In the process of re-defining the scope of the project, it was determined that most of the safing work required could be accomplished in-house.

A Phase 1 cleanup has been completed and Space Florida is now evaluating the scope of any additional work that may be necessary.

Please continue to check our website at www.spaceflorida.gov for the latest information regarding the maintenance and repair of this facility.
